UMIYA ARTS AND COMMERCE COLLEGE FOR GIRLS**

Green Campus Policy

Ours is a campus where environmentally friendly practices and education work together to promote sustainable and eco-friendly practices. The green campus concept allows us take the lead in redefining its environmental culture and developing new paradigms by developing sustainable solutions to the world's environmental, social, and economic needs and thus bring change at local level, too.

Environmental goals and objectives at the college level:

The college is attempting to grow its institution in the areas of electricity, water, and sanitation on a self-sustaining basis.

Faculty, staff, and students work together to create an eco-friendly, sustainable campus and to spread the notion of eco-friendly culture to the surrounding community and wherever practicable.

Environmental challenges, such as climate change, are brought to the attention of students and staff through the development of awareness materials. The institute believes in the policy of three R's- Reduce, Recycle and Reuse.

Waste Management

- To boost the green cover on and around the campus, waste management is being implemented.
- Adopt trash segregation strategies and take necessary steps to reduce garbage on campus.
- Dispose of e-waste in a proper method.
- To limit the amount of hazardous trash and the amount of time it takes to manage it.
- Actions conducted on campus to limit plastic usage, thus making ourselves a sustainable campus.
- Encourage a paperless work culture.

Water Management

- Rainwater harvesting
- Plants and trees are watered using recycled water.

We plan to continue to enhance our systems and practices, as well as review the policy on a regular basis to ensure its continuing relevance and compliance.

Ghale
