

WELCOME TO PRESENTATION

Prof. Poonam Zala,
Asst. Professor,
Computer Department
Umiya Arts and Commerce College

* COMPUTER GENERATION

So let's go to see some thing about

Computer

□ At first we should to know....

What is computer

We know that

Computer is an
electronics device.

But if we deeply think

● *we can understand that.....*

- ◆ Computer is the most wonderful contribution of modern science. It is a set of electro mechanical device, which can sense electrical signal & logic.
- ◆ 'It can process this electrical signal according to the logic'.

History of computer

Computer is invented by the hard work of many scientists. Charles Bavez is called the father of modern computer. He invented the structure of computer at first in '1833'. His invented computer had five parts. This were store, mill, control, input & output, after this it has been rapidly modified and many other computers have been invented.

Generation of computer

- ▲ Computer is divided in some generation-
- ▲ Now I am displaying this all generation...

1st Generation -1942-1958.

2nd Generation – 1958-1965.

3rd Generation – 1965 -1970.

4th Generation – 1970 -1995.

5th Generation – 1995 – Future.

TYPES OF COMPUTER-

**Type
s**

Of

computer

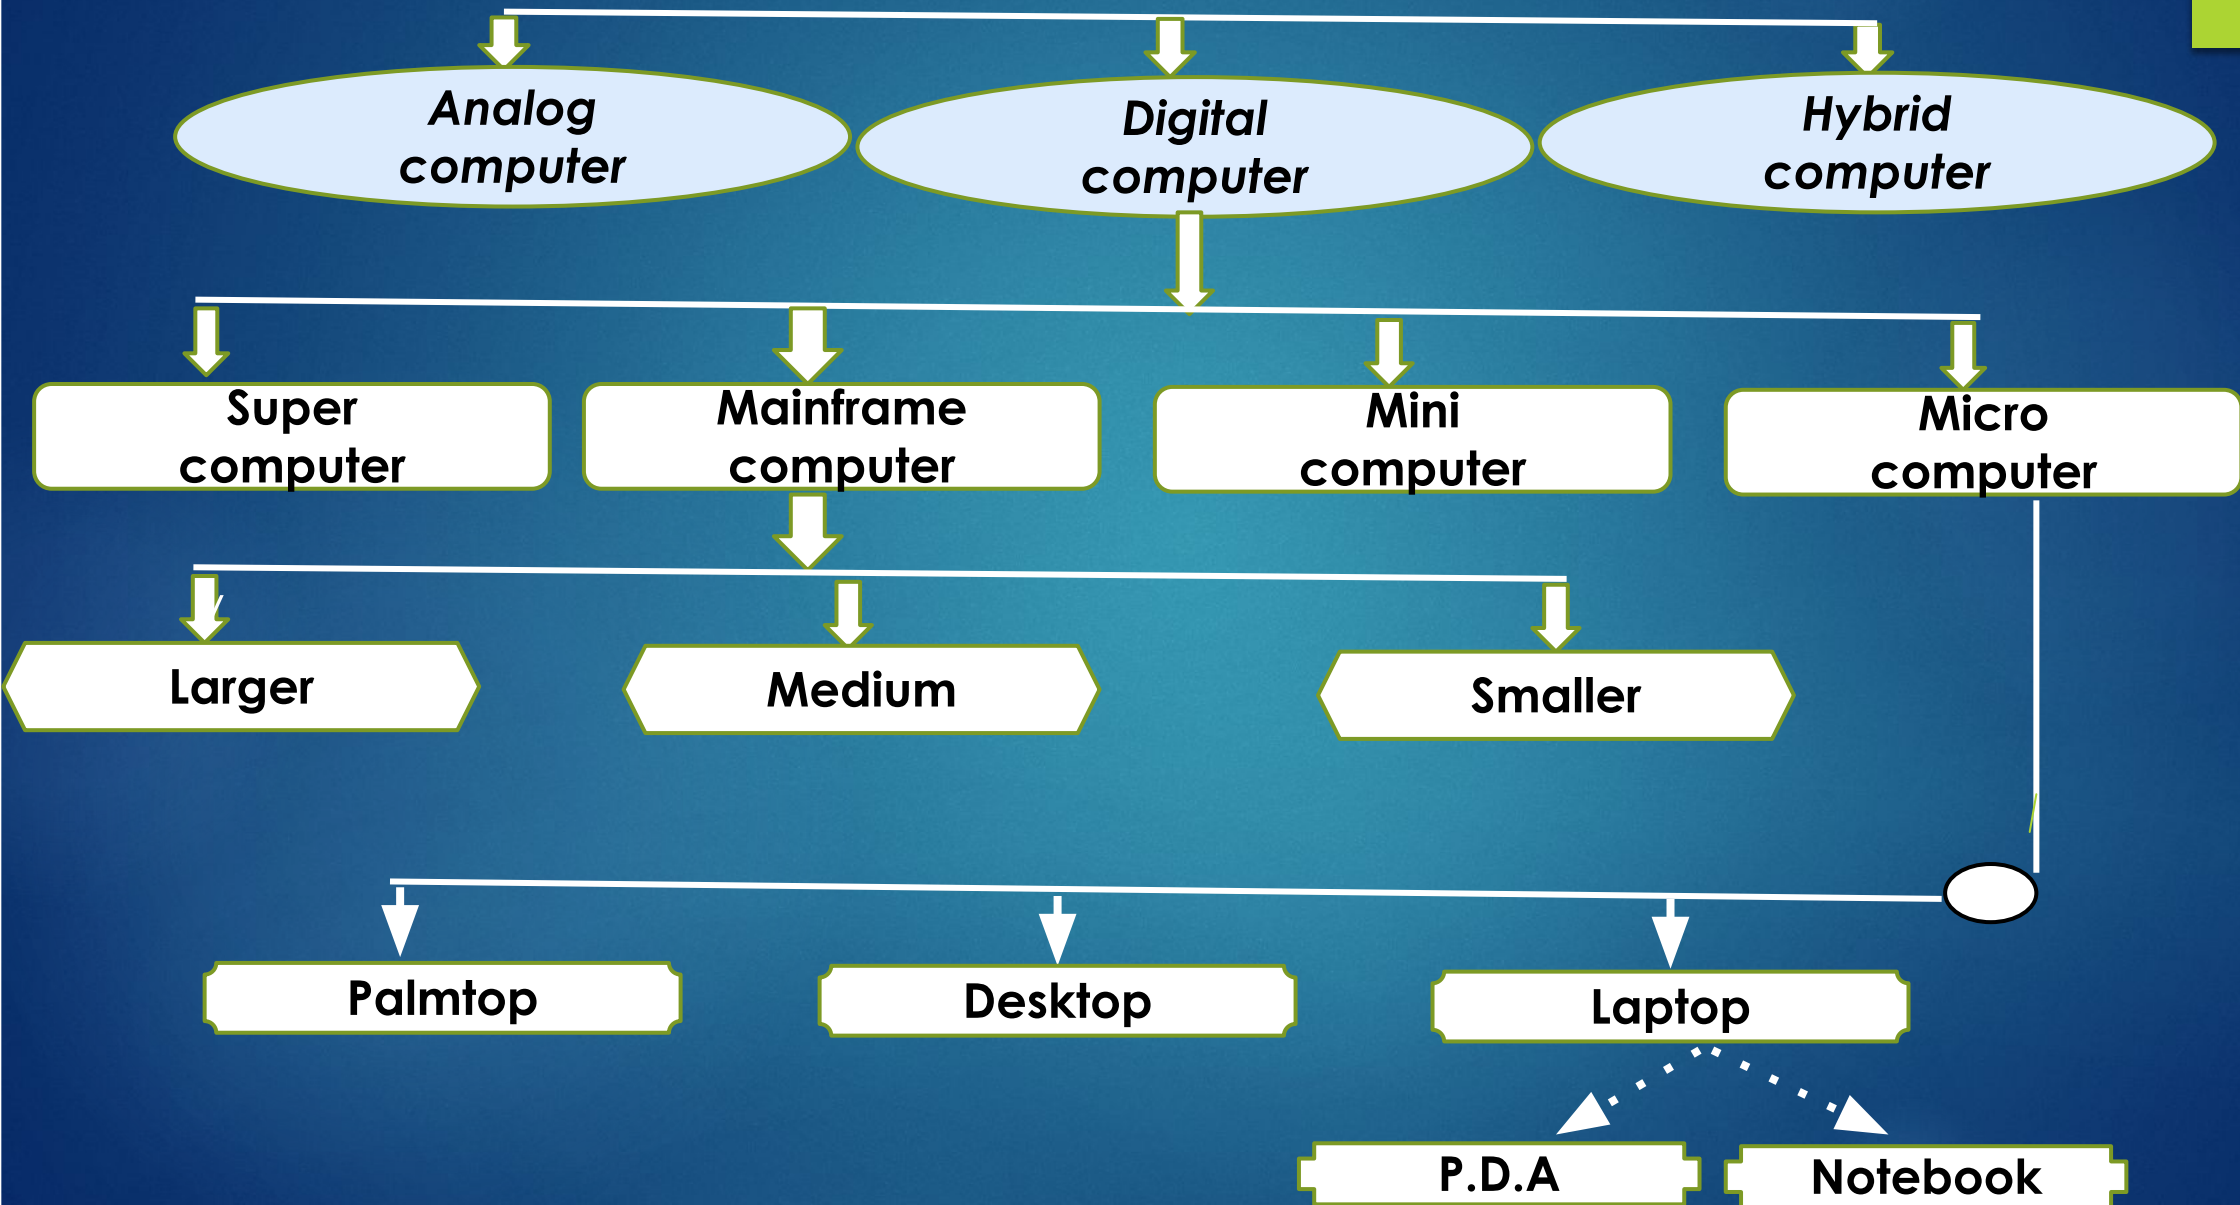

To properly know about the types of computer

We must need to see a diagram
about

The types of computer

Computer

Now I am telling to you about
“Micro computer.

**Micro
computer**

```
graph TD; A[Micro computer] -.-> B[Palm Top]; A -.-> C[Desk Top]; A -.-> D[Lap Top];
```

Palm Top

Desk Top

Lap Top

**PALM
TOP**

Picture of some desktop computer

Laptop computer

Palmtop

- Palm top is a small enough to hold in one hand and operate with the other
It's also called 'hand top'

Desktop

Desktop is a favorite computer for user.

It has some special parts than another computer.

Now I am describing something about the parts of computer.

Let's go...

Parts of desktop computer

Desktop computer have a CPU, monitor, mouse, keyboard, printer, modem, speaker etc.

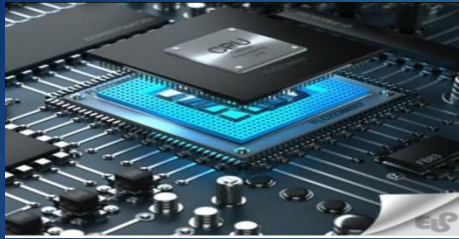

Hard disk

Cooling fan

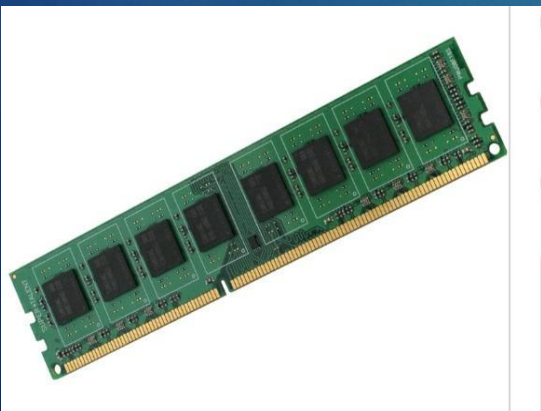

Processor

Motherboard

RAM

List of input device

- MOUSE
- KEY BOARD
- SCANNER
- MODEM
- MICR
- TOUCH SCREEN
- DISK
- OCR
- OMR
- ETC.

List of output device

- MONITOR
- SPEAKER
- PRINTER
- PLOTTER
- MAGNETIC TAPE
- MICRO FILM
- PENDRIV
ETC.

THANKS TO ALL...
