Summary of the Activity

The workshop for Film Technology was organized on 8th September, 2017 at Umiya Arts and Commerce College for Girls. The registration started at 9:00 a.m. After the registration, the inaugural function took place where the President and the Vice President of KVC Education Trust, the Principal, the faculty members and the participants were present.

In the opening session, the speaker made understand what cinematography means. He explained that it is ultimately about capturing the desired images. He further explained various techniques used to capture these images. The speaker explained the role of cinematographer and discussed in detail various aspects like short lists, floor plans and lighting diagrams, handling the camera and light crews etc.

In the second session, the speaker explained the strength of the team work on the set. In the third session, the speaker discussed the most important film making tips which aren't actually camera techniques or film lighting tricks but peoples' skills. In the fourth session, the speaker discussed sound and colour effects to create dramatic contrasts and juxtapositions. He also discussed about the hard light versus soft light.

In the concluding session, the participants raised their queries which were solved by the expert speaker. There were 53 participants. The highlight of this workshop was the galaxy speaker who enlightened the participants with his precious knowledge.
